ABSTRACT

Since Indian independence in 1947, successive governments have emphasised the link between improving access to finance and reducing poverty. In the year 1950s the creation of a nationwide network of rural cooperative banks was an attempt to improve financial access for India's poor, 75% of whom are concentrated in rural areas. This was followed by further measures aimed at increasing financial access- the nationalisation of commercial banks in the late 1960s, and an aggressive drive through the 1970s and 1980s to expand rural banking. India is an agro based economy since beginning and major contributor in national income of country and the majority of the sector comes from weaker section or from below poverty. To develop & rapid the growth of economy the government of India took major initiative after the independence & made the significant provision in various five year planning's of country to increase food grain & promote the cultivation operations & for the betterment of deprived section of India such as green revolution plan etc. after the independence but along with the promotion of field operation in rural areas and weaker section, the need of financial assistance & promotion was felt for the radical growth of rural areas, weaker section and boost up the agro economy. The aim of writing this paper is to analysed comparative growth of banking sector in rural area and development of micro finance services in India and to what extant banking & MFS achieved their motive of establishment.

1. INTRODUCTION

The first microfinance program began in the developing world in the early 1960s' and emerged in the United States in the early 1980s. In India the Microfinance has become an indispensable part of India's economy. The financial needs of India's rural areas reflect the volatile, uncertain, and irregular income streams and expenditure patterns. Critical examinations of their prerequisites show that poor people value financial services and want them to be reliable, convenient and flexible. India boasts a range of institutions providing microfinance which consists of formal financial institutions at one end of the spectrum and private moneylenders at the other. Microfinance services are provided by banks, credit unions, and microfinance organizations, which are also known as micro enterprise development organization (MDO). Microfinance, now clearly a worldwide movement, is embraced by governments, corporations, banks, development agencies, business communities, civil societies, and philanthropists. Although the exact scale of the microfinance industry is imperfect because of incomplete data and self-reporting, several data sources shed some light on the industry. For example, the states of microcredit institutions have reported reaching 92, 270, 289 clients, 66, 614, 871 of whom were among the poorest when they took their first loan. Of these poorest clients, 83.5 percent, or 55, 622, 406 are women." The "poorest" are defined as persons living below their nation's poverty line or living on less than one U.S. dollar per day, estimated at 1.2 billion people. Owing to the increase in the economic development and growing Gross Domestic Product

(GDP) of India, there is an increasing demand for financial assistance, especially in microfinance. This demand is not only from corporations and financially stronger groups but also from the lower sections of the society. The delivery of financial services to lower sections of the society is called financial inclusion. Most commercial banks in the country cater to the financial needs of people. The poor section of the society is deprived of financial assistance due to the absence of collateral/ financial security. For meeting the requirements of this segment, microfinance institutions (MFIs) were set up that acted as a provider for the underprivileged section of the society.

On 12th July 2002 pm Atal Bihari Vajpayee outlined an eight-point agenda to push the economy on a growth path of 8% during the 10th plan microfinance is being practiced as a tool to attack poverty. the world over the growth of micro finance is visible in many aspects. there are more than 2000 no involved in the NABARD shg bank linkage programme out of these 800 ngos are involved in some form of financials interme diation. further there are 350 new generation co-operatives providing thrift & credit services according to our estimate the present total outstanding including sa-dham members & bank linkages is approximately rs. 700 crores other client base is estimated at 6-8 million as opposed to the gov. of India intention to reach 25 million clients the growth of community institutions has taken place with the role to take social & financial intermediation.

2. RESEARCH METHODOLOGY

Our research methodology requires gathering relevant data from the specified documents and compiling databases in order to analyse the material and arrive at a Comparison between deposit services of banks and other financial institutions.In this research we will use primary data as well as secondary data. Primary data will be collected by Questionnaire and focussed group interviews and Secondary Data will be collected by reference books, journals and internet.

3. CONCEPT OF MICROFINANCE INSTITUTES IN INDIA

Microfinance in India finds its roots in the early 1970s' in Gujarat when the Self Employed Women Association formed a group in order to provide banking services to the poor women of unorganized sector. This concept is called 'Self-Help Groups' (SHG). The program which links the Self Help Group and the banking sector was initiated in India in 1989, under National Bank for Agriculture and Rural Development (NABARD). The banks that are associated with this program aid in capacity building and empowerment of the group.
Sorts of Microfinance Foundations in India

Microfinance foundations are essentially of two sorts; 'for benefit' and 'not revenue driven' organizations. The second class organizations are typically the trusts and social orders that works with the assistance of awards. These establishments are either enlisted under the Social orders Enrollment Act, 1860 or the Indian Trust Acts, 1882.

Then again, the 'revenue driven foundations' are either the co-employable social orders or the Non-Banking Budgetary Organization. In the ongoing time frame numerous little monetary foundations are transforming into Non-Banking Budgetary Establishments by getting a permit from the Save Bank of India (RBI). To acquire the permit, the base subsidizes necessity is Rs. 5 crores. Likewise, the foundation may buy the previously existing permit of the dead organization.

According to the 2015 report of Save Bank, there were just 69 Non-Banking Money related Organization and microfinance foundations enrolled with the summit banks. Be that as it may, greater part of them had a place with the capital city of Karnataka, Bangalore (IRAR, 2015). Then again, the rest of the banks were non-authorized little scale microfinance foundations. Probably the greatest and most composed little scale budgetary establishment in India incorporate SKS, Bandhan, Ujjivan, Janalakshmi, Basix, Spandana and Silk. The territory of Andhra Pradesh by and by has the most number of such organizations just as borrowers.

4. SEMI MICROFINANCE ASSOCIATIONS IN INDIA

Microfinance in India is running under two fundamental models of microfinance one is Self-Helping Gathering (SHG) Model and other one is Smaller scale budgetary establishment model, for example, -

A) National Bank for rural and Provincial Improvement (NABARD) and Microfinance
Microfinance in India is assuming a significant job in destitution mitigation and is generally credited for its achievement both broadly and universally. As we probably am aware India's work power is made out of Horticulture (60%), Industry (12%) and administrations (28%) which obviously demonstrate that even today agribusiness is a significant wellspring of salary and business, keeping this in see legislature of India thought of National Bank for Farming and Provincial Improvement (NABARD) in the year 1982 as a National advancement bank. The establishment was certify with all issues worried to approach, arranging and operational in the field of credit for agribusiness and monetary exercises further all vital issues designing to giving and Guideline of credit and different offices for the advancement and improvement of horticulture, town businesses, painstaking work and other provincial specialties. "The corporate strategic NABARD is to make microfinance accessible to the degraded poor and under special gathering of the country regions. It offers a methods for arriving at poor people who are let well enough alone for the formal money related area. NABARD is basically better approach to make a versatile and maintainable work and to meet the neglected accessibility of assets for business identified with farming. It has given linkage to Self improvement Gathering's since most recent three decades; NABARD had doled out itself the job of a facilitator and a guide of the activity. The attention was on acquiring different partners on a typical stage, building limit among the partners to take the progress ahead while stretching out 100% renegotiate to all banks taking an interest in the program (NABARD, 2012)"3. Other than that, NABARD directs enormous number of classes, workshops and preparing projects to make mindfulness about the microfinance program among all the partner.

B) Small Ventures Advancement Bank in India (SIDBI) and Smaller scale Financing
In center of the band lie semi-formal microfinance suppliers. Eminent conventional part microfinance suppliers in India are SIDBI (Little Businesses Advancement Bank in India), ICICI Bank, SBI Bank, and so on. In spite of various endeavors, the casual segment comprising of proprietors and brokers give microfinance office at high rates. An investigation led by RFAS in 2003, revealed that 44% of the country family units still acquire cash from casual specialists.

5. DEVELOPMENT PACE OF THE MICROFINANCE BUSINESS OF INDIA

Microfinance in India is running under two essential models of microfinance one is Self-Helping Gathering (SHG) Model and other one is Small scale budgetary foundation model. The SHG model deals with the rule of legitimately financing to SHG by the banks and MFI model spreads financing of smaller scale money institutions(MFIs) by banking offices to loan a similar

add up to SHG's and other little barrowers (NABARD, 2009). From one side it is Self improvement Gathering (SHG) which depends on the sparing of gatherings (SG) that is self-guided network based gatherings that give their individuals access to essential monetary administrations. SHGs are made out of 15 to 25 self-chose people who meet routinely (generally week after week or fortnightly) to spare and, whenever wanted, get for brief periods, paying month to month enthusiasm at a rate set by the gathering (Aga Khan Advancement System [AKDN]) even government is approaching to support these SHG's. From the opposite side microfinance establishments discover the denied ones and causes them to approach account with their very own and from government associations particularly from NABARD and SIDBI.

The budgetary foundations and SHG's in India have set their standard to decrease neediness since decades. There are some budgetary establishments which appeared yet don't move for the long, anyway their commitment can't the overlooked. These organizations have added their best to stretch out microfinance back rub to the individuals and had accord for the up-liftmen of the secured region ".

6. ISSUES IN SMALL SCALE FINANCING IN INDIA

Microfinance organizations in India need to confront countless difficulties which goes about as a boundary to their prosperity. There are a few impediments in the working of these money related foundations, for example,

- High financing costs, opportunity.
- No assortment in the items offered to the clients and
- lower hazard alleviation measures and numerous such others (Nasir, 2013).
- Aside from these different difficulties include:
- Not covering the urban poor in its compass,
- High non-performing resources (NPAs),
- Poor credit evaluation framework,
- lack of mindfulness, poor obligation the executives and
- weak advance assortment framework.

In spite of the weaknesses they structure a significant piece of the working of numerous ventures because of simple advances given to the individuals who generally can't bear the cost of better offices. In any case, the industry capacities defectively as it was clear from the 2010 Andhra Pradesh microfinance emergency.
Store of MFI

MFI contributors are exceptionally heterogeneous. It is critical to portion these customers and create explicit procedures for each gathering as for the sort of administration they are offered, adjustment of existing items to the necessities of each gathering, making of new items and development destinations. It is imperative to fragment customers by store size and furthermore by such criteria as age and sex. It is valuable for MFIs to break down their own customer databases in more noteworthy profundity so as to all the more adequately situate promoting and strategically pitching endeavors. Most MFIs have not done this yet, now and again in view of constrained databases, yet much of the time since they have not perceived the significance of this work. Banks and different MFIs generally comprise the chief challenge for microfinance foundations in pulling in investment funds. The principle qualities of MFIs in catching stores are their generally high loan costs, customized and effective help, a picture of money related strength, the way that no commissions or record upkeep expenses are regularly charged, low least sums for opening records, and the neighborhood underlying foundations of locally based

MFIs. MFI shortcomings in preparing stores include: the absence of national systems like those of banks, which encourage installments and moves; their generally low total assets; the absence of mechanized teller machines (ATMs); and the constrained scope of administrations advertised. Drawing in stores makes extra operational dangers and fundamentally influences the market chances that MFIs face: liquidity chance, term befuddle hazard, loan cost hazard and swapping scale chance. Store activation impactsly affects MFIs in producing and alleviating every one of these dangers.

Drawing in stores makes new difficulties for MFI showcasing exercises since MFIs must contend in the market with the entirety of the built up mediators. A showcasing division or unit is expected to design publicizing efforts, break down customers and customer fulfillment levels, and design and direct the utilization of correspondences media.

7. CONCLUSION

Financial advancement through effort of microfinance program has a key bearing on the improvement of human capital and along these lines, thus, impacts the recurrence of neediness and under favored strengthening. Foundations like NABARD and SIDBI have require the coordination exertion with the target of reinforcing and principle spilling the future tasks of microfinance for the elevate of each wing of the needy individuals and society NABARD and SIDBI has improves the area of microfinance and has seen critical measure of assets being reserved towards meeting the credit needs of poor people. The financial system experienced a development stage without comparables on the planet and all the more critically denied individuals got the advantages of the distinctive monetary administrations. These two organization carry the idea of have the right to want in the realm of microfinance in India.
